Hulsen, Tim

### **Abstract**

EredivisieStats.nl shows the results from all matches played in the Dutch Eredivisie soccer league. The navigation menu gives the users a number of options. Users can browse through the matches [1], matrices [2] and tables [3]. The site also includes a number of preselected tables: current table [4], year table [5], home table [6], away table [7], corrected table (in which the table is corrected for the strength of the opponents) [8], and the eternal table [9]. Information on champions [10], top scorers [11], records [12], playoffs [13] and cup finals [14] is also included, as well as an overview of the latest Eredivisie news [15]. Clicking on any of the club logos brings the user to a page with club-specific information [e.g. 16]. Last but not least, the site offers a tool to predict results of matches in the current season, using information from the past ten years [17].
